tl;dr

My background is in Physics, I've studied it in **Granada** (Spain) and in **Munich** (Germany). I like solving problems, the simpler the better. I'm from a **tiny town in Jaén** (Spain). I like talking about music and bands in Granada for which I made some songs and sing. The first contact I had was around winter 2012. Started with **node** which led to **express**, **jade** and **mongodb** which I wanted to really learn something from the ground up so I looked around and found **gulp**. I prefer doing things and then talking about them instead of the other way around. I believe in honesty. I believe in patience and hard work.
